## Nerve Eze

Bioavailable PEA and ALA  
for Healthy Nerve Function\*

### Nerve Eze Supplementation

Nerve Eze contains two of the most potent ingredients to promote healthy nerve function: PEA and ALA.\* Together, they promote healthy functioning of the body's endocannabinoid system to support nerve function, stress response, relaxation, and healthy immunity.\*

Using Levagen®+ PEA in Nerve Eze supports increased functionality and bioavailability.\* Levagen®+ has undergone human clinical studies demonstrating its safety and effectiveness in enhancing the absorption of PEA over standard formulas.\*<sup>1,2,3</sup>

The ingredients in Nerve Eze are congruous with what research suggests to be effective and safe, particularly for promoting healthy nerve function.\* Clinical evidence and research cited herein show that the ingredients in Nerve Eze may:

- Promote healthy nerve function with the enhanced absorption of PEA as bioavailable Levagen®+\*
- Promote healthy functioning of the endocannabinoid system\*
- Support healthy stress response\*
- Support restful sleep and relaxation from PEA's calming effects on neurological pathways\*
- Support healthy immune response\*
- Support balanced moods and neurological health\*
- Promote positive measures of quality of life\*

### How Nerve Eze Works

PEA is a bioactive lipid that plays a key role in the endocannabinoid system, which is responsible for promoting balanced systems, including the central and peripheral nervous systems.\*<sup>4</sup> The ECS helps promote relaxation and healthy nerve function.\*

PEA is produced naturally in every cell of the body in a biological response to inflammatory markers. Supplementation with PEA helps to promote healthy nerve function by supporting healthy levels of mast cells and glial cells during stress response.\*<sup>4,5,6</sup> PEA promotes healthy nerve function and comfort and may improve quality of life.\*

## How Nerve Eze Works Continued

Nerve Eze adds alpha-lipoic acid (ALA) to the PEA formulation to further support healthy stress response.<sup>♦7, 8</sup> ALA has multiple antioxidant properties and supports healthy glutathione levels in the body's cells.<sup>♦9</sup> Clinical studies show PEA and ALA work together to promote healthy nerve function and stress response.<sup>♦7, 8</sup>

An added benefit of using bioavailable Levagen<sup>®+</sup> in the Nerve Eze formula is its ability to promote restful sleep and relaxation.<sup>♦10, 11, 12</sup> PEA has a calming effect on neurological pathways, which ultimately influences immunity, balanced moods, and quality of life.<sup>♦10, 11, 12</sup>

## Supplement Facts

Serving Size: 1 Capsule  
Servings Per Container: 60

	Amount Per Serving	%DV
Palmitoylethanolamide (PEA) (Levagen <sup>®+</sup> )	300 mg	*
Alpha Lipoic Acid (ALA)	150 mg	*

**Other Ingredients:** Hypromellose, microcrystalline cellulose, vegetable magnesium stearate, silica.

Levagen<sup>®+</sup> is a registered trademark of Gencor<sup>™</sup>.

**Directions:** Take one capsule twice daily or as directed by your healthcare practitioner.

**Caution:** If you are pregnant, nursing, or taking medication, consult your healthcare practitioner before use. Keep out of reach of children.
